

Identifying National Importance - Case study

Application

Working as a sub-group on a table and using the grant abstract provided, describe the national importance of the project (as either a paragraph or series of bullet points)

Validation/Review

Working as a sub-group, take the output from the other sub-group on your table. Validate this output against your jointly developed statement of what you would expect to see in a case for support (from activity 1). Identify any aspects you think have been missed in this description of the project's national importance.
