

Establishing the National Quantum Computing Centre Town meeting

10:00am to 16:00pm, Monday 21 August 2019, Central London

UK Research and Innovation (UKRI) wishes to inform you of a town meeting for those interested in our programme on establishing the National Quantum Computing Centre.

Background

As part of the Industrial Strategy, the Government have committed an additional £315m to the National Quantum Technology Programme (NQTP) in 2018, in recognition of the important role that quantum technologies play in underpinning the four Industrial Strategy Grand Challenges.

The UKRI National Quantum Computing Centre (NQCC) will enhance the UK's global leadership, allow it to translate its research strength into innovation and produce the first generation of quantum computers that will enable the UK to create a competitive advantage with new products and services. Acting now will allow us to take advantage of the strength and opportunity we generated through the first phase of the National Quantum Technologies Programme.

Aim of the Event

This event aims to create an opportunity for attendees to engage with progress on the NQCC programme, and to network with peers.

Express of Interest

Please complete the following expression of interest form

(<http://www.smartsurvey.co.uk/s/QuantumComputing>) to attend. Closing date is

Monday 5 August 2019.

Please note the event is likely to oversubscribe and sifting will take expertise and balanced representation of organizations into consideration.

All applicants will be informed of the outcome shortly after the closing date of the call.

If you have any questions please contact QuantumTechnologies@epsrc.ukri.org
